Informed Consent for General Dental Procedures

You, the patient, have the right to accept or reject dental treatment recommended by your dentist. Prior to consenting to treatment, you should carefully consider the anticipated benefits and commonly known risks of the recommended procedure, alternative treatments, or the option of no treatment.

Do not consent to treatment unless and until you discuss potential benefits, risks, and complications with your dentist and all of your questions are answered. By consenting to the treatment, you are acknowledging your willingness to accept known risks and complications, no matter how slight the probability of occurrence.

It is very important that you provide your dentist with accurate information before, during, and after treatment. It is equally important that you follow your dentist's advice and recommendations regarding medication, pre and post treatment instructions, referrals to other dentists or specialists, and return for scheduled appointments. If you fail to follow the advice of your dentist, you may increase the chances of a poor outcome.

Please read the items below and sign at the bottom of the form.

2. Drugs and Medications

I understand that antibiotics, analgesics, anesthetics and other medications can cause allergic reactions causing redness and swelling of tissues; pain, itching, vomiting, and/or anaphylactic shock (severe allergic reaction). I understand anesthetics can cause a loss of sensation that can last an extended period of time and in some rare cases can be permanent.

3. Changes in Treatment Plan

I understand that during treatment it may be necessary to change or add procedures because of conditions found while working on the teeth that were not discovered during examination, the most common being root canal therapy following routine restorative procedures. 4. Permission to Bill Insurance

I give permission to the dental office to bill my dental insurance provider for the treatment provided, if applicable.
